PROFESSIONAL SUMMARY

Experienced QA Engineer with 2 years plus of expertise in testing web, mobile, and API-based applications across various industries, including social media, e-commerce, and food technology. Proficient in both manual and automated testing using Selenium, Appium, Postman, Cypress, and Playwright. Skilled in test case design, execution, defect tracking, and reporting. Adept at collaborating with cross-functional teams in Agile/Scrum environments to ensure high-quality software delivery.

WORK EXPERIENCE

QA Tester

Mar 2023 - Nov 2023

Holla • Ikeja

- Performed manual and automated testing for the company's social marketplace platform, where fans and celebrities connect
- Developed and maintained Selenium WebDriver and Appium-based test automation scripts to improve test coverage and efficiency
- Conducted API testing using Postman to validate the integration and functionality of the platform's backend components
- Reported and tracked defects using Jira, collaborating closely with the development team to ensure timely resolution
- Participated in test case review and planning meetings to identify areas for improvement and enhance the overall testing strategy

QA Tester

Mar 2022 - Jun 2023

Sozochow • London, United Kingdom

- Assisted in manual testing of the company's mobile application, which connects customers to restaurants and stores with surplus unsold food
- Performed smoke, sanity, and regression testing to ensure the quality and usability of the mobile application
- Reported and tracked defects using Jira, contributing to the continuous improvement of the application

QA Engineer

Oct 2021 - Present

Kominiti • Florida, United States

- Designed and executed comprehensive test cases for the company's social job site, which connects freelancers and job owners, covering both web and mobile platforms
- Developed and maintained Selenium, Cypress, and Playwright-based test automation suites to ensure consistent and reliable testing across multiple browsers and devices
- Performed thorough API testing using Postman, validating the functionality and integration of the application's backend
- Collaborated with developers and product managers to identify, prioritize, and track defects, ensuring timely resolution and high-quality releases
- Participated in Agile/Scrum ceremonies, including sprint planning, daily standups, and retrospectives, to align testing efforts with the development lifecycle
- Utilized TestRail to document and manage test plans, cases, and results, providing valuable insights and recommendations to stakeholders
- Mentored junior QA team members on testing best practices, tool usage, and problem-solving techniques

QA Tester

May 2020 - Present

Freelancer • Ikeja

- Provided on-demand QA services to various clients, including web, mobile, and API-based application testing
- Designed and executed manual and automated test cases using Cypress, Postman
- Identified and reported defects, collaborating with clients to ensure timely resolution
- Utilized Jira to document and manage test plans, cases, and results, providing comprehensive reports and recommendations
- Adapted to diverse project requirements and delivered high-quality testing services to meet client expectations
